## Barton Abrasive Removal Tool Achieves Removal Rates of Over 3,000 lbs/hr

*"We run 24/7 and cannot afford downtime. With BART we remove sand from the tank without shutting down the waterjet. Can't say enough good things about the tool or the company behind it."*  
Lloyd S., Nogeles, AZ

BARTON ABRASIVE REMOVAL TOOL

### No Downtime – Maximize Cutting

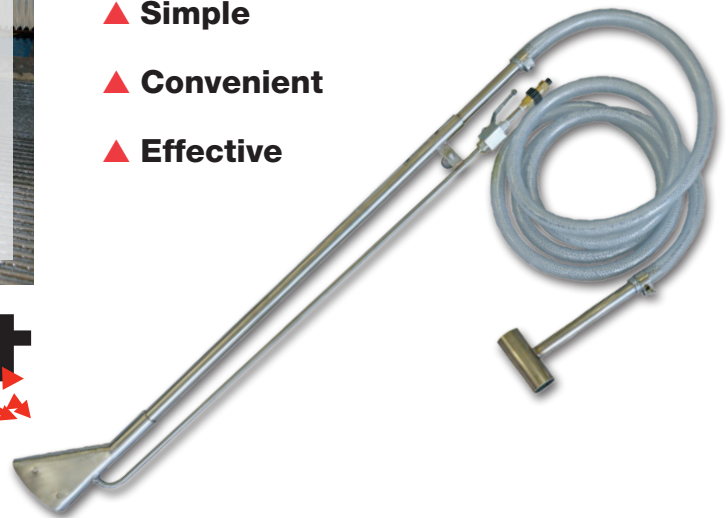

- Simply place the BART Wand between the slats to pump garnet while continuing to cut parts on the table.

### Easy to Use

- Simple to assemble and easy to operate.
- Requires a 2.5-3.0 gpm, 2500-3000 psi pressure washer.
- Efficient design combined with effective technology works hard so you don't have to!

The Barton Abrasive Removal Tool – BART® is a convenient, economical and completely portable system for removing spent abrasive from your waterjet holding tank – while the waterjet keeps running.

- ▲ **Simple**
- ▲ **Convenient**
- ▲ **Effective**

### Low Maintenance – Lower Costs

- No moving parts, pumps or filters; a single wear part – the replaceable Jet Nozzle.
- Garnet is pulled up the Wand and discharged through the hose never coming into contact with the pressure washer.
- A fraction of the cost of other abrasive systems.

### Portable – Use on Multiple Machines

- Lightweight and portable, the system can be used on multiple machines.

## Accessories

### BART® Portable Diffuser

Helps suspended solids to settle quickly in the collection vessel so water returned to the table is free of abrasive.

- Lightweight and portable

### BART® Tip Hopper

The most convenient method of collecting and transporting spent abrasive.

- Discharge receptacle with spout, 3/4 yard capacity
- 18" discharge hose returns overflow water back to your waterjet table
- 8" steel casters allow for easy movement

### BART® 55 Gallon Drum with Diffuser

The diffuser helps suspended solids to settle quickly in the collection vessel so water returned to the table is free of abrasive. Convenient for customers who dispose of abrasive in 55 gallon drums.

- 55 gallon capacity discharge receptacle with attached diffuser
- A forklift mounted drum tipper is recommended for moving and emptying of drums (not included)

*"Our old clean out method of shoveling by hand is antiquated and labor intensive. **With BART, one person can clean the bed in less than half the time.** It's a huge savings."*

*Herb S, Aberdeen, WA*

## Revolutionary

The Barton Abrasive Removal Tool – BART® has revolutionized the way our customers remove spent garnet from their waterjet equipment. First introduced in 2009, BART is an easy to use, inexpensive and totally portable garnet abrasive removal system. Since then, hundreds of waterjet operators have used this remarkably convenient, efficient, versatile, cost-effective piece of equipment.
