HYDROBLOC SUPERBRICK

Durable and long lasting, HYDROBLOC® bricks hold up to the rigors of waterjet cutting.

Our "SUPERBRICK" is the most durable brick on the market.

Features & Benefits of the HYDROBLOC® SUPERBRICK

- **HYDROBLOC SUPERBRICK** is welded and strategically screwed for superior durability.
- **Part Retention**—the even, flat cutting surface prevents parts from falling into the tank.
- **Better Looking Parts**—HYDROBLOC bricks eliminate spray back that can mark the underside of parts.
- **Cleaner Cutting Area**—special internal design drains water away from the cutting area, reducing splash back.
- **Quieter Operation**—cutting noise is reduced creating a quieter workspace.
- **Flexibility**—can be used with abrasive waterjet cutting and water only cutting.
- **Durability**—made from a tough polypropylene material, HYDROBLOC will not separate allowing for more cuts and greater savings.
- **Less Brick Debris**—sections of the bricks are less likely to fall into the tank; less debris in the tank is easier on garnet removal systems.
- **Recyclable**—the polypropylene material is 100% recyclable.
- **Lightweight**—a standard brick weighs 11 lbs., making them easy to change and rotate.

Order Today (800) 741-7756

Part #WX404005, (3.85" x 6" x 48") is available in single brick quantities or full pallets of 40 bricks.
